## GoPrint Installation

### INSTALLING POSTGRESQL 13.6 DATABASE

1. Download and run [Postgres 13 installer](#)
2. Follow default installation options until choosing password
3. Set a password for Postgres
4. Continue with installation choosing default options
5. After installation completes, uncheck Stack Builder option and click Finish

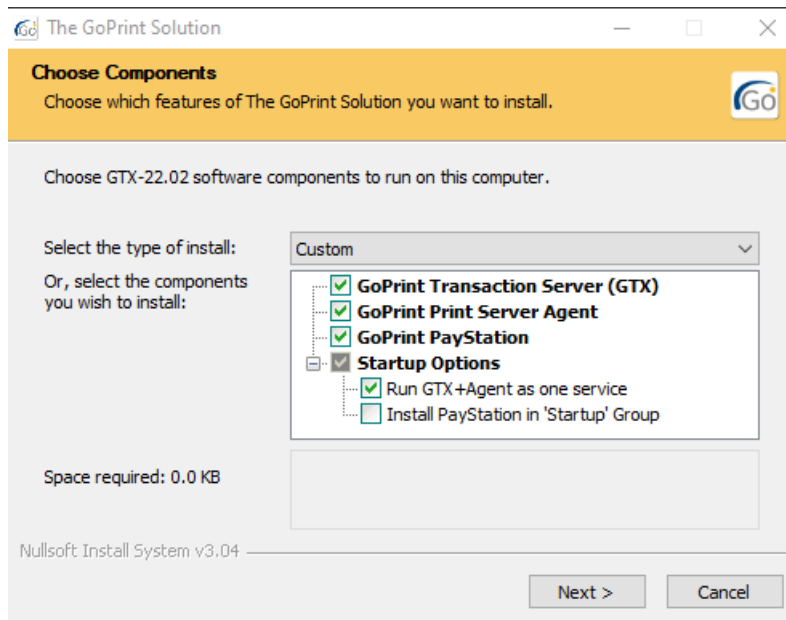

## INSTALLING GOPRINT SOFTWARE

1. Download and run latest installer from <http://software.goprint.com>

2. Choose Components:
  - a. GoPrint Transaction Server (GTX)
  - b. GoPrint Print Server Agent
  - c. Run GTX+Agent as one service

3. Continue with installation using default options and click Finish
4. A readme will open automatically in the browser with details on Next Steps
5. Proceed to GoPrint Node Control at <https://127.0.0.1:7767/>

(Browser will likely produce a security warning. Click on *Advanced* and then *Proceed to 127.0.0.1*)

6. Choose Configure Database tab

7. Change JDBC Driver to **JDBC PostgreSQL** using the drop-down menu

**Configure Database**

Configure Database Edit Configuration

You do not have a database configured yet. Click If you wish to use GS-4 for demonstration purpo and click Create Database.

JDBC Driver Server Database Name User ID Password

JDBC:HyperSQL  
JDBC:HyperSQL  
JDBC:IBM DB2  
JDBC:Microsoft SQL Server  
JDBC:MySQL  
JDBC:Oracle Database  
JDBC:PostgreSQL  
no password is set.

Apply Create Database Test Connection

8. Enter the following into the fields:
  - a. Server: localhost
  - b. Database Name: goprint
  - c. User ID: postgres
  - d. Password: use password created for Postgres, earlier

JDBC Driver JDBC:PostgreSQL

PostgreSQL  
POWERED

Server localhost

Database Name goprint

User ID postgres

Password

9. Click Create Database

Apply Create Database Test Connection

JDBC Driver class org.postgresql.Driver was located.  
Database configuration has been saved.  
**Successfully created database goprint.**  
Connectivity test succeeded for new database.  
**Use the Services link above to restart the GTX service.**

10. Navigate to Services tab

11. Start GoPrint (GTX) Service

Configure Database	Edit Configuration	Services	TLS Certificate	Security	Updates
<b>Services on Brierley @ 192.168.2.17</b>					
<b>Online Services</b>					
<b>Agent</b>		Stop			
<b>GTX</b>		Stop	<a href="#">GoPrint Control Center TLS</a> <a href="#">GoPrint Web Client TLS</a> <a href="#">GoPrint Control Center</a>		

12. Navigate to GoPrint Control Center at <https://GTX-HOSTNAME:7770/> (Use machine name)  
 13. To access, enter default Username/Password: admin/admin (Please update this to a more secure password)

Username

Password

Secure Log In

14. Base installation is complete. GoPrint may require licensing and configuration from a service technician at this point. The software may also require an update.

## UPDATING GOPRINT

1. Download update .zip file from <http://software.goprint.com>

**Use the System - Web Update Tool to update GoPrint after initial installation**

[GoPrint 22.03 \(Build: 12459\)](#)

To be used only with existing versions of GoPrint 22.##

2. Move update file from the Downloads folder to C:/GoPrint/Updates  
 3. Open Windows Services  
 4. Stop and start GoPrint Service to apply update

Services (Local)				
GoPrint Service				
Name	Description	Status	Startup Type	
Google Update Service (gupdate)	Keeps your ...		Automatic (...)	
Google Update Service (gupdatem)	Keeps your ...		Manual	
GoPrint Service	GoPrint Ser...	Running	Automatic	
GraphicsPerfSvc	Graphics pe...		Manual (Trig...	

- After a few seconds, the Control Center at <https://GTX-HOSTNAME:7770/> should be active again. If not, go to <https://127.0.0.1:7767> and check/start Services.

## REINSTALLING GOPRINT

When re-installing the software, follow these steps to avoid reconfiguring the database connection and system licensing settings:

1. Run *services.msc* and **Stop** the *GoPrint* service
2. Open the *C:\GoPrint* folder and copy *goprint.cfg* and *gtx.keystore* to a safe location
3. Uninstall GoPrint via *C:\GoPrint\uninst-goprint.exe* or through **Windows Programs and Features**
4. Run the GoPrint install application
5. Open *C:\GoPrint* and paste the copied *goprint.cfg* and *gtx.keystore* files inside, overwriting the existing default files
6. Run *services.msc* again and **Start** the *GoPrint* service
7. Navigate to <https://MACHINE-NAME:7770> to log in
